## FEATURED BENEFITS

- This Hybrid Blend of 2 premium yarns is a top range solution for contact sports to playgrounds. Quite simply, Performance Play will deliver an excellent standard of play and longer useful life.
- Smart Flow greatly improves flow compared to traditional hole punch urethane backing. Along with large holes every 3", its fully permeable design allows liquids to pass through. Tiny open holes across every millimeter of the backing and a special coating lock in the yarn while keeping the rest permeable.
- S-Blade with Luster Guard ribbed surface texture is the lowest luster UV stabilized turf yarn in the industry. These microscopic ribs eliminate the shiny mirror effect that makes artificial grass look like plastic.
- S-Blade yarn takes durability to the next level! Its fiber wear was tested at 50,000 cycles (50,000cycles + 20 years of wear). This gives a visual indication on how a synthetic turf system will age in time and the ribbed blade eliminates weak points in fibers creating unprecedented split resistance.
