## Turf Claw® 75

Polyurethane Turf Adhesive (1 Gallon)

### Specs

Available in 1 gallon pail

Single-component, moisture-cured polyurethane adhesive

No mixing required for faster installation

Fast grab time (1–3 hours) and ~24-hour full cure

100% solids, solvent-free formulation

Low / no odor

Green color

Compatible with seam tape, concrete, and asphalt substrates

Use with proper ventilation and protective equipment (gloves, eye protection)

### Features

Turf Claw® 75 is a high-performance polyurethane adhesive engineered for the permanent installation of artificial turf systems. Its moisture-cured, single-component formula simplifies installation while delivering exceptional bond strength for seams and full installations.

The adhesive's controlled expansion allows it to penetrate turf backing for a secure, long-lasting bond without excessive foaming. Ideal for landscape turf, playgrounds, and athletic fields, Turf Claw 75 performs consistently even in humid conditions.

Designed for professional use, it should be applied with proper ventilation and standard protective equipment to ensure safe and effective installation.
